Hi Brenda – attached is the updated Source 1 by itself, and then the completed version to date of the DR, which includes all the well information I could find. There are 4 wells that had been recently sampled (2015-2016) I was not able to find any information on besides the fact that they were in the Tronox database. LSM-47 (Level II well), PV-04 (Level I Well), PV-06, and SMT-D (Level II Well). Maybe someone there knows about these, maybe they go by another name? I looked through all the Phase II information with no luck. Let me know if you have any questions – thanks! - Michelle
